

# RUST BAN

## RUST & LIME SCALE REMOVER

**RUST BAN** is a colorless liquid blend of selected acids and neutralizable biodegradable surfactants. It is a highly efficient, heavy duty product formulated for treating ferrous metal surfaces. It removes iron oxide and passivates surfaces for prolonged periods. The main function of **RUST BAN** is to retard the spread of rust under the painted surface when the paint film is broken. It cleans and brightens most metal surfaces.

**RUST BAN** is also effective in removing rust, lime and calcium deposits on brick, stone, stucco, concrete, metals, ceramic, tile, porcelain and glass.

**DIRECTIONS FOR USE:** Do not mix with anything but water. Can be used full strength or diluted with water as needed. Rinse the surface with water to break the surface tension and wash away loose dirt and grime. Apply by brush or sprayer application. Always apply first to the bottom surface and work upward to prevent streaking. For metals to be painted apply full strength allow to dry, then apply paint. Do not rinse off. For concrete, brick, stone and stucco apply this product directly on rust stains. Allow a few minutes to penetrate then rinse with water. Difficult stains may require a second treatment. Dissolves calcium, lime and hard water deposits on porcelain tile and glass.

**PRACTICAL TREATMENT CAUTION:** Contains phosphoric acid. Wear protective eye-wear and rubber gloves. If contact occurs flush with large amounts of water for at least 15 minutes. If swallowed do not induce vomiting, drink large amounts of milk or water. Call a physician immediately. Get prompt medical attention. Consult MSDS for further information.

Please Follow Good Safety  
Practices
