

# ALUMA-BRITE

## CLEANS AND BRIGHTENS ON CONTACT

**ALUMA-BRITE** is a colorless liquid blend of selected acids and neutralizable and biodegradable surfactants. Cleans and brightens aluminum, stainless steel, copper, brass, and non-ferrous metals. In just seconds, the industrial strength formula dissolves grease, oil stains, grime and road film. Removes oxidation from any aluminum surface. Cleans as it works. **ALUMA-BRITE** is a safer product designed for users that do not want to use hydrochloric acids. Because it does not contain these acids it is not as aggressive on the aluminum, but will still clean and brightener. Will not etch glass.

### DIRECTIONS FOR USE:

Do not mix with anything but water. Can be used full strength or diluted with water as needed. Solution concentration varies, depending upon the condition of surface involved. The usual ratio is 1 part **ALUMA-BRITE** to 9 parts water. It may be applied by brush or spray application. ALWAYS apply first to the bottom surface and work upward to prevent streaking. Agitate the surface with a long handled brush if necessary. Allow **ALUMA-BRITE** solution to remain on the surface approximately 10 minutes but DO NOT ALLOW TO DRY! Returning to the point of initial application, rinse thoroughly with a pressure water rinse, beginning at the top surface and rinsing downward.

### PRACTICAL TREATMENT CAUTION:

Contains sulfuric acid. Wear eye-ware and rubber gloves. If contact does occur flush with large amounts of water for at least 15 minutes. If swallowed do not induce vomiting, drink large amounts of milk or water. Call a physician immediately. Consult MSDS for further information.

Please Follow Good Safety  
Practices

**KEEP THIS AND ALL CLEANING PRODUCTS  
OUT OF THE REACH OF CHILDREN**
