

CRETE CLEAN

CONCRETE REMOVER

CRETE CLEAN is a colorless liquid blend of **NEW SAFE ACID** technology coupled with a new generation biodegradable surfactant. It is highly efficient, heavy duty product formulated for removing mortar, cement and concrete from trucks, mixing equipment, bricks, ceramic tile, and most metallic surfaces.

CRETE CLEAN is non-corrosive to skin, based on DOT skin corrosive tests. It is also safe and effective on rubber, fiberglass and plastic. **CRETE CLEAN** is a non-fuming acid mixture which is inhibited to minimize attack on metal.

DIRECTIONS FOR USE: Do not mix with anything but water. For severe conditions use full strength. For light duty cleaning, dilute with water as needed. Rinse the surface with water to break the surface tension and wash away loose dirt and grime. May be applied by spray, brush or dip method. Allow to remain on the surface to be cleaned until encrustation is removed. Rinse thoroughly with water. Heavily soiled areas may require a second treatment.

CAUTION:

While this product is considered non-corrosive to skin safety precautions should still be taken. Wear protective eye-ware and rubber gloves. If contact does occur flush with large amounts of water for at least 15 minutes. If swallowed do not induce vomiting, drink large amounts of milk or water. Call a physician immediately. Consult MSDS for further information.

Please Follow Good Safety
Practices

**KEEP THIS AND ALL CLEANING PRODUCTS
OUT OF THE REACH OF CHILDREN**
