

D-SCALE

LIME SCALE REMOVER

D-SCALE is a colorless liquid blend of **NEW SAFE ACID** technology coupled with a new generation biodegradable surfactant. It is highly efficient, heavy duty product formulated for removing lime, calcium and rust deposits on brick, stone, stucco, concrete, metals, porcelain, ceramics and glass.

D-SCALE is non-corrosive to skin, based on DOT skin corrosive tests. It is also safe and effective on rubber, fiberglass and plastic. **D-SCALE** is also ideal for removing tannin stains around swimming pools, hot tubs and on concrete.

DIRECTIONS FOR USE: Do not mix with anything but water. Can be used full strength or diluted with water as needed. Rinse the surface with water to break the surface tension and wash away loose dirt and grime. For concrete, brick, stone and stucco apply this product directly on the rust stains. Allow a few minutes to penetrate then rinse with clean water. Difficult stains may need a second treatment or administer light scrubbing. For shower, tub and tile, spray directly on surface, allow up to 5 minutes to penetrate then rinse with water. Dissolves calcium, lime and hard water deposits on porcelain, tile and glass.

CAUTION:

While this product is considered non-corrosive to skin safety precautions should still be taken. Wear protective eye-ware and rubber gloves. If contact does occur flush with large amounts of water for at least 15 minutes. If swallowed do not induce vomiting, drink large amounts of milk or water. Call a physician immediately. Consult MSDS for further information.
