

SOY-SOLV

BIODEGRADABLE ENIRONMENTALLY FRIENDLY NONTOXIC

These words are not only becoming more popular, but more necessary to slow down the destruction of the ozone and the Earth. When it comes to making our world a little safer and a cleaner place, we look for alternatives to previously acceptable chemicals. The question is: What is an environmentally-friendly product that gives us the level of performance that we have become accustomed to? The answer is no further than America's Heartland - Soybeans.

The obvious benefits to methyl esters is the improvement in health and the environment. Additionally. Utilizing methyl esters in your processes supports the American farmer. The more soy-based products that are purchased on the open market, the less that the government needs to subsidize the farmers. The use of methyl esters will also lessen our dependence on foreign sources and keep important profits within the United States.

Are you looking to reduce your VOCs? Soy methyl esters are usually below 50 grams per liter

SOY-SOLV is an excellent stripper, cleaner and degreaser with a wide range of applications. The product is formulated with bio-solvents made from soy and corn. It is recommended for cleaning industrial equipment, automotive parts and machinery. It works well on unsealed concrete surfaces, brick, wood and metal.

!SOY- SOLV is ideal for stripping paints, resins, polyurethane, latex, high gloss alkyd enamel and 100% acrylic latex. It can be used to remove adhesives, cosmetics, asphalt and tar, shoe polish, felt tip and colored inks and gum.

FEATURES:

- Non Toxic
- Low VOC
- Biodegradable
- Bio Based Soy
- Rapidly Renewable Resource

Formulated with surfactants contained in the U.S. EPA's DfE (Design for the Environment) CleanGredients database.
